

Numbers Up and Down

I'm learning how to count,
From zero up to ten.
I start from zero every time
And count back down again.

Zero, one, two, three,
Four and five, I say.
Six, seven, eight and nine,
Now I'm at ten ~ Hooray!

But, I'm not finished, no not yet,
I got right up to ten.
Now I must count from ten back down,
To get to zero again!

Ten, nine, eight, seven,
Six and five, I say.
Four, three, two, one,
ZERO - Hip - Hooray!
